

# Non Farm Payroll

Change in the number of employed people during the previous month, excluding the farming industry

## Important news events for today

Currency	Impact		Detail	Actual	Forecast	Previous
USD	🔴	Average Hourly Earnings m/m	📁		0.3%	0.3%
USD	🔴	Non-Farm Employment Change	📁		870K	850K
USD	🔴	Unemployment Rate	📁		5.7%	5.9%

### 1. Average Hourly earnings

Change in the price businesses pay for labor, excluding the farming industry  
We have noticed positive outcome in Jun and neutral outcome in Jul . A positive outcome will likely to push USD price higher

History	Actual	Forecast	Previous
<a href="#">Jul 2, 2021</a>	0.3%	0.3%	0.4% ↓
<a href="#">Jun 4, 2021</a>	0.5%	0.2%	0.7%

### 2. Non-Farm Employment Change

Change in the number of employed people during the previous month, excluding the farming industry  
We have noticed positive outcome in Jun and neutral outcome in Jul . A positive outcome will likely to push USD price higher

History	Actual	Forecast	Previous
<a href="#">Jul 2, 2021</a>	850K	725K	583K ↓
<a href="#">Jun 4, 2021</a>	559K	645K	278K ↓

A **positive** outcome means increase in jobs hence good for the economy which will have a positive impact on USD Dollar Index will likely to rise and currencies trading against dollar will likely to get weaker  
Like EURUSD prices will go down , Whereas USDJPY prices will go up

How can you trade ?

A **negative** outcome means decrease in new jobs hence bad for the economy which will have a negative impact on USD Dollar Index will likely to drop and currencies trading against dollar will likely to get stronger  
Like EURUSD prices will up, Whereas USDJPY prices will go down

### 3. Unemployment Rate

Percentage of the total work force that is unemployed and actively seeking employment during the previous month. Higher unemployment will result in weaker USD and vice versa

History	Actual	Forecast	Previous
<a href="#">Jul 2, 2021</a>	5.9%	5.6%	5.8%
<a href="#">Jun 4, 2021</a>	5.8%	5.9%	6.1%
