New money inflow is coming on a regular basis. Corporate giants are accumulating more and more BTC. There is no exact date but most likely anytime from now till Dec period. When it happens, we will likely cross 10T market cap in this super cycle season

We are noticing huge outflow of BTC from exchanges – which also indicates huge price movement will come soon

Another industry which I think will be huge is P2E tokens  
Gaming industry with NFTs can be real game changer
