

Bitcoin – Multiexchange Analysis

As you can see the green bars below are longer than the red bars – indicates long traders are getting liquidated more than short traders. On 13th June 504M(longs) & 274M(Shorts) got liquidated. This clearly indicates whales are still pushing the price down

When more long traders are getting liquidated – that means we are still far from bottom

When more short traders starts to get liquidated – that means bottom is approaching

Expect price to go more down

Expect price to start going up
